Coding, AI-assisted workflows, digital systems thinking, process improvement, web-based tools, automation concepts, and creative technology strategy.

FOCUS AREAS

- Civic arts access
- Artist and community support
- Creative public programs
- Technology-enabled operations
- Modern arts education

PROFESSIONAL SUMMARY

Brittney Chase is an Encinitas-based civic arts and creative technology professional with experience leading arts programming, community engagement, and creative initiatives connected to the City of Encinitas. Her background combines public arts leadership, digital systems, coding, artificial intelligence, and community-centered program development. She brings a rare blend of creative leadership and technical fluency, helping bridge cultural programming, public service, modern digital tools, and practical systems improvement.

EXPERIENCE

City of Encinitas

Arts Department Leader / Head of Arts Department | Encinitas, CA | Dates TBD

- Led or supported arts department initiatives connected to public arts, cultural programming, and community-facing creative experiences.
- Developed and coordinated programs designed to connect residents, artists, educators, and local organizations through accessible arts experiences.
- Supported arts education, workshops, events, and public engagement programs across civic and community settings.
- Brought a technology-forward mindset to arts operations by applying coding knowledge, AI tools, and digital workflow thinking.
- Worked across creative, administrative, and public-service priorities to support stronger cultural participation and local arts visibility.

CREATIVE TECHNOLOGY & AI

- Uses technical problem-solving to improve creative workflows, organize information, and support more efficient program operations.
- Understands how coding, AI tools, and digital systems can support arts programming, communication, education, and civic engagement.
- Able to translate between creative goals and technical execution, making her valuable in organizations modernizing cultural programs.

SELECTED IMPACT AREAS

Arts Leadership

Public-facing creative programs, cultural initiatives, arts education, and local arts support.

Community Engagement

Programs and experiences that encourage participation, collaboration, and civic connection.

Digital Systems

Coding, AI, and operational tools applied to creative department needs and modern workflows.

RESUME POSITIONING

Best-fit roles include Creative Technology Director, Civic Arts Program Manager, Arts & Innovation Lead, Community Arts Director, or Cultural Programs & Digital Systems Specialist.
