

Brittney Chase

Encinitas Local | Creative Arts | Technology | AI Applications | Management

Professional Bio

Brittney Chase is an Encinitas local with a background in creative arts, community engagement, technology, and general management. She brings together a strong creative perspective with a growing technical skill set, including coding, AI applications, Claude Code, workflow automation, and the development of AI-assisted systems and solutions.

Brittney earned her master's degree in Computer Science from San Diego State University, giving her a foundation in technical problem-solving, systems thinking, and digital innovation. Her professional interests sit at the intersection of creative programming, public-facing work, technology, and practical AI implementation.

Outside of her professional work, Brittney enjoys raising her two children, staying connected to the Encinitas community, exploring creative arts, and continuing to learn new tools that expand what is possible in modern work environments. She is especially interested in using AI and automation to make systems more efficient, creative, and accessible.

Core Strengths

Creative Arts & Community Experience and interest in creative arts, community-facing work, cultural programming, and local engagement.	AI & Technical Learning Active skill development in AI applications, Claude Code, coding workflows, automation, and AI-assisted systems.	Management & Systems Thinking A practical management mindset focused on organization, clear communication, process improvement, and scalable solutions.
